HACKLE SECURITY SERVICES LTD

Cookie Policy

This Cookie Policy was last modified on 24th May 2018

Hackle Security Services Ltd ("us", "we", or "our") operates https://www.hacklesecurity.co.uk (the "website").

By using this website, you agree to the collection and use of information in accordance with this policy.

Hackle Security Services Ltd uses cookies to track your visit to our publicly accessible web pages.

By using this Service, you consent to the use of cookies.

As a rule, cookies will make your browsing better. We use this information to establish the number of unique visitors to our website, pages navigated, save preferences and provide tracking data helping us provide a better digital experience.

What are cookies?

A cookie is a small text file which is transferred on to your computer, smartphone or tablet via your web browser to help the site provide a better user experience.

Cookies may be "temporary" or "session" cookies, used while you visit our website. They are deleted when you close your browser, or "permanent" cookies, which stay on your device's permanent storage until you delete them manually or your browser deletes them after a certain period. Please see your web browser settings for more information.

How we use cookies

When you use or access our Services, we may place several cookies files in your web browser.

We use cookies for the following purposes; to enable certain functions of our Service, to provide analytics, to store preferences and to enable advertisements.

Our website does not keep or use any personal information. Any anonymous information is handled according to our Privacy Policy as seen on our website.

However, you may prefer to disable cookies on this website and on others. The most effective way to do this is to disable cookies in your browser. We suggest consulting the 'Help' section of your browser, but be aware that certain functionality may not be available to you.

Third-party cookies

In addition to our own cookies, we may also use various third-party cookies to report usages statistics. This includes social media analytics, Google Analytics and third-party marketing software analytics. This information is collected to see the success of our own advertising campaigns.

For more information on this subject, please visit www.aboutcookies.org website.
